2: affiliation (depart, lab, organization, city, country), email:address2@yahoo.fr

Abstract

Insert your text here (times new roman, 10, Italic). An abstract of about 300 -500 words should be included and be as informative as possible, avoiding any experimental details or detailed values presentation. The abstract should not contain tables, figures, references and sentences of the introduction.

Keywords: A maximum of 5 meaningful keywords separated by a comma should be listed, preferably in alphabetical order, avoiding abbreviations and using keywords of a maximum of three words.

I. Introduction

Insert your introduction here (times new roman, 10). Manuscripts should be divided into sections (and subsections by headings I, II, III: times new roman, 10, G, and subheadings A, B, C: times new roman, 10, G).

Footnotes to the text are to be avoided. In the text, sections, tables, figures and equations are to be referred as abbreviated Sect. x, Tab. x, Fig. x, and Eq. (x), respectively.

Please use italic symbols for variables and constants (e.g., p , V , n , R , T), bold Latin symbols for vectors and matrices, and roman type for mathematical expressions (e.g., log, ln, tan, exp). Please do not use one variable for different definitions.

Symbols used to represent variables, constants, quantities, properties, etc. must be defined in the text at their first occurrence. Please use exponents and not slashes within units, e.g., $\text{g L}^{-1}\text{h}^{-1}$. Only SI quantities and units are to be used. If data with non-SI units have to be reported, they should be put in parentheses behind the corresponding data with SI units. In addition, a list of all symbols and abbreviations used must be compiled at the end of the text under the heading "Symbols used".

Use the equation editor (Microsoft Equation Editor 3.0 or Math type 6.0) for equations and have to be

numerated in ascending order with Arabic numerals in parentheses.

Figures: Either incorporate the figures into the text or indicate their place in the text. Figures should be clear and the lettering legible and proportional to the size of the figure so that reduction is possible if necessary. Figures will appear in color online and in the final PDF once the paper has been accepted. However, if you wish them to appear in color in print, there will be a charge. Otherwise they will appear in black and white. Please make sure to supply a high resolution copy also in black and white.

Figures, photos, illustrations and graphs should be referred to in the text as figures and numbered consecutively throughout the paper by Arabic numerals.

Figures should be sent as TIF, JPG, GIF or EPS files with highest resolution possible (at least 300 dpi). Please do not implement the figures in MS Word files.

Figure Legends: The figure legend (beginning with, e.g., "**Figure 5.** Title", times new roman, 8) must explain in detail the contents of the figure and – as the figure itself – must be comprehensible without reference to the text.

Tables: Tables should be cited in numerical order in the text using Arabic numbers. The table

headings should be as follows: **Table 1, 2, 3**. Title (times new roman, 8). Each table should have a descriptive title.

Acknowledgment: Acknowledgments of financial support, advice, or other kinds of assistance should be made at the end of the paper under the heading “Acknowledgment”. Please do not use any abbreviation!

List of symbols: A list of symbols is required if equations are used.

References: References must be identified by Arabic numerals (e.g. 1, 2 etc.), numbered consecutively in the order in which they are first mentioned in the text (between square brackets []) and listed at the end of paper. For example:
Articles in journals: 1. J.D. Jacobson, M.D. Kennedy, G. Amy and J.C. Schippers, Phosphate limitation in reverse osmosis: An option to control biofouling?, Alg. J. Eng. Res., 1 (2016) 198–206. Please make sure to include titles of articles.

Chapters in books: 2.M. Mickley, In: M. Wilf, Guidebook to Membrane Desalination Technology, University Constantine 3 Publications, Constantine 2007, pp. 375–389.

Books: 3.R. Sheikholeslami, Fouling of Membrane and Thermal Units. A Unified Approach to its Principles, Assessment, Control, and Mitigation, University Constantine 3 Publications, Constantine, 2007.

When citing a paper appearing in a proceedings volume, make sure you refer to the journal (not to the proceedings).

Manuscript Arrangement and Format

The sequence of the parts of the main document should be:

Title of the article – Authors – Abstract – Keywords – Main text – Figures - Figure Legends - Tables with headings - Acknowledgment – List of symbols – References .

Please submit your papers as a MS Word file:
Familyname.docx
