

People's Democratic Republic of Algeria  
University of Constantine 3-Salah Bounider

The Faculty of Political Sciences organizes the  
first national scientific conference entitled:

**The Algerian grand strategy to  
achieve the objectives of global  
security and sustainable  
development**

**Date: February 13 and 14, 2024**

**Honorary presidency of the conference:**

- Pr. Riad Hamdouche-Director of the University

**General supervision of the conference:**

- Pr. Saliha Kebbabi-Vice-rector of the University
- Pr. Malika frimeche-dean of the faculty

**Guest of honor of the conference:**

- Pr. Sakina Damia-University of Algiers 3

**President of the Conference:**

**DOCTOR : NABIL DIB**

**Preamble:**

Acknowledging the multitude of threat forms and their diverse origins, as well as the imperative of achieving global and sustainable development, this conference addresses the task of formulating a comprehensive Algerian strategy. It seeks to integrate sub-strategies in alignment with the state's vision and mission, with the ultimate goal of addressing successive threats and achieving long-term strategic objectives across various domains, including politics, defense, security, economy, media, and society, among others.

Furthermore, recognizing the academic and functional synergy, this conference underscores the significance of drawing insights from Algeria's historical experiences. This includes its armed struggle against occupation, its battle against internationally supported terrorism, and its developmental trajectory. In this context, an expansive discourse becomes essential to identify strategies that are most pertinent for expediting progress in a stable and coordinated manner while concurrently addressing existing threats and preemptively preparing suitable responses.

**Key Conference Issue:**

In a complex strategic landscape, how can Algerian decision-makers attain comprehensive security and sustainable development through a holistic scientific strategy?

**Forum Sub-Issues:**

The central issue gives rise to the following inquiries:

- How can the concept of strategy be tailored and refined in accordance with our unique reality, history, and objectives?
- What military and security strategies are best suited to counter threats from the external strategic environment, whether they are national, regional, or global in nature?
- Which sectors are pivotal to overall development, and how can they enhance their performance?

- What foreign policy approach is most apt for navigating the intricacies of the international arena, and how can the role of diplomacy be fortified to maintain a favorable status while averting conflicts that might deplete our resources and efforts?
- What are the primary impediments to establishing a productive, diversified, and hydrocarbon-independent national economy, and which strategies are most efficacious in realizing this strategic goal?

**Objectives of the Conference:**

1. Contribute to the development of theoretical foundations and methodological tools for the science of strategy, customized to the national strategic landscape.
2. Mitigate diverse threats and safeguard national security.
3. Strengthen the role of diplomacy within a multifaceted risk environment.
4. Foster an in-depth dialogue on the most effective methods for reducing reliance on hydrocarbons and promoting energy integration.

**Focus of the Conference:**

1. Comprehensive Strategy: Conceptual and Theoretical Frameworks
2. Military and Security Strategy and External Environmental Challenges
3. Foreign Policy and Diplomatic Services
4. Sub-strategies for Global Security: Food, Water, Environment, Health, and Energy
5. Information Strategy and Cybersecurity
6. Cultural, Linguistic, and Community/Identity Security Strategy
7. Addressing the Challenges of Building a Diversified, Productive Economy, Administrative Reform, and Rationalization of Sectoral Policies
