International Seminar on:

Organise

Sensitive areas in Algeria :

First National Seminar on:

The challenges of planning, urbanisation and the prospects for sustainable development

Sensitive areas in Algeria:

The challenges of planning, urbanisation and the prospects for sustainable development.

11th and 12th December 2024

Urban Technical Management Institute

11th and 12th December 2024

Honorary President of the Seminar:

Professor BAITICHE Chaabane – Rector of the University of Constantine 3 Salah BOUBNIDER

President of the Seminar: Dr. MEDDOUR Oualid – Head of the Urban Technical

Honorary President of the Seminar:
Professor BAITICHE and Environment Department Constantine 3 Salah BOUBNIDER

Seminar General Coordinator

Dr. MEDDOUR Oualid – Head of the Urban Technical and Environment Department

Seminar General Coordinator
M. KHALED Foudil (Urban Technical Management Institute)

ARGUMENT:

Sensitive areas are among those that have long experienced and continue to experience several problems and difficulties, due to their distinctive natural features, which make up a harmonious geographical, economic, and social entity, and a particular urban structure that includes cities, centres, and small towns, which are subject to a constant exodus of population.

According to law 01-20 on land use planning and sustainable development (mountainous areas, coastal areas, border areas, desert areas), as sensitive areas that need to be taken into account in terms of attention to the living conditions of the population, the identification of additional actions necessary for their protection, the development of living centres and the establishment of the facilities and services necessary for life in these areas, the elimination of isolation by improving transport and telecommunications networks and the better use of local resources by developing traditional industries, tourism and recreational activities appropriate to the local economy of these regions. They will be promoted and benefit from all the measures allocated to them under this law.

The development of sensitive areas, through national programs, is still trying to make them an integral part, but it must be recognised that they are distinctive "sensitive" areas due to their geographical reality and natural influences, as they are among the areas that are undoubtedly experiencing the phenomenon of urbanisation and development, which is not negligible in maintaining the balance of the urban network of the national territory.

Urban and regional planning instruments, particularly national and regional development and planning plans, have attempted to take account of the development and planning prospects of these areas at various levels by promoting urban centers, strengthening basic infrastructure in these areas and encouraging population stability in these areas. The government has also endeavored, through the administrative division, to increase the number of municipalities in these special zones in order to better control these areas.

Honorary President of the Seminar:

Professor BAITICHE Chaabane - Rector of the University of Constantine 3 Salah BOUBNIDER

President of the Seminar:

Dr. MEDDOUR Oualid – Head of the Urban Technical and Environment Department

Seminar General Coordinator

M. KHALED Foudil (foudil.khaled@univ-constantine3.dz)

AIMS OF THE SEMINAR:

The seminar aims to achieve several objectives, the most important of which are as follows:

1. To open a scientific debate and a forum for exchanging experiences on the reality of sensitive areas in Algeria.
2. To identify and define the levels of development of sensitive areas in Algeria.
3. To seek ways, mechanisms, and programs for the development of sensitive areas.
4. Work on a scientific and systematic approach to urbanisation and the sustainable development of sensitive areas.
5. To promote the sustainable development of sensitive areas to develop the local economies of these regions.

Seminar Topics:

1. **Coastal zones:** tourism, urban centers, and industrial areas: from fragility to polarisation.
2. **Mountain areas:** Population migration, urban growth, agricultural, economic, and tourism development.
3. **Border areas:** Experiences in the development of border areas as geostrategic spaces.
4. **Desert areas:** Natural and urban challenges, climate change and development prospects.

11th and 12th December 2024

TARGET POPULATION:

- ✓ Lecturers and researchers in the fields of geography, town planning, urban development and social sciences;
- ✓ Experts and specialists in territorial development and sensitive areas;
- ✓ Local authorities, various departments, and specialist bodies in the field;
- ✓ Civil society organisations with an interest in sensitive areas.

Honorary President of the Seminar:

Professor BAITICHE Chaabane - Rector of the University of Constantine 3 Salah BOUBNIDER

President of the Seminar:

Dr. MEDDOUR Oualid – Head of the Urban Technical and Environment Department

Seminar General Coordinator

M. KHALED Foudil (foudil.khaled@univ-constantine3.dz)

SCIENTIFIC COMMITTEE:

President of the Scientific Committee: Dr. DJEGHAR Aicha
